			· ·		

Traffic of the construction firm on the arterial road leading from Bustow/Pomerania toward Gross Gilling-See (Danzig) went to a construction site which was generally designated Object X. The purpose of the construction was not known. In 1955, 3 buildings equipped with cellars were completed. The area of the buildings was surrounded by a 2-meter high concrete wall topped by a barbed-wire barrier. Prior to August 1957, the installation was occupied only by some civilians who were quartered in these buildings.

[the buildings housed a large switchboard which served for the main telephone connections between Poland and abroad and all high-

ranking Polish offices. The object has its own generator.
